Village Water – Ted Powell with Aquifer Science and Technology, presented his company's proposal for the water resource study in the Village of Hewitt. Ted stated he would retrieve the data from wells drilled within the Village limits. AS & T would use the data to determine depth of bed rock, direction of flow on the under ground water source, and identify potential ground water contamination sources.

The questions proposed by the committee were:

1. Identify the current water resource.
2. Determine what percent of the resource is currently being tapped into by private wells and the recharge rate to the ground water supply.
3. Will the existing resource support more growth ?

Smart Growth Planning

Jason Grueneberg with Wood Cty Planning & Zoning attended the Feb. 18th meeting. Further discussion on Smart Growth was tabled for the upcoming March 23rd. meeting.

Parking

The proposal sent to the Village Board for action per the Jan 26th Planning Committee recommendation, did not receive Board approval. The Committee discussed and revisited the street widths in the Village of Hewitt. Other than limiting parking on the streets, another option would be to widen all Village streets. Changing the street widths was perceived as not a practical option due to cost impact and required reconstruction.

A motion was made Kris, second by Jeff to disallow parking on the even house numbered sides of All Village streets with the exception of Yellowstone Drive which would have no parking on either side; with signage to be implemented in phases to be completed by 2012. Parking on County "T" (Main Street) would not change as current practice would comply. The above recommendation will be presented to the Village Board at their Feb. 9th Village Board meeting.

- Next meeting is planned for March 23, 2010 @ 7:00 PM. Village of Hewitt Hall

Meeting adjourned @ 9:10
